THE JOURNAL OF
LOGIC PROGRAMMING

VOLUME 36, NUMBERS 1, 2 and 3, 1998

CONTENTS

Regular Papers
Polymorphic type analysis in logic programs by abstract interpretation **1**
Lunjin Lu

Subsumption-stratified Datalog **55**
Michael Meskes

Regular Papers
Combining negation as failure and embedded implications in logic programs **91**
L. Giordano and N. Olivetti

Creating specialised integrity checks through partial evaluation of meta-interpreters **149**
M. Leuschel and D. De Schreye

Regular Papers
LogicWeb: Enhancing the Web with logic programming **195**
S.W. Loke and A. Davison

The theoretical foundations of LPTP (a logic program theorem prover) **241**
R.F. Stärk

Relationlog: A typed extension to Datalog with sets and tuples **271**
M. Liu
